

SYNERGIES FOR SUCCESS

SCHMID E-MOTIVE: YOUR STRATEGIC PARTNER

Participate from SCHMID E-MOTIVE as your strategic partner for the production of your electrical drive systems: whether as a development partner in the lab, as a supplier for small batch production or as an experienced partner in the construction of turnkey solutions for series production. We are here to support you wherever you need us.

FEASIBILITY STUDIES

The production of electric motors is an extensive task requiring complex processes. At our inhouse laboratory, our process specialists offer the oppotunity to carry out feasibility studies in order to support your industrialization right from the initial idea. Together we are sure to get your production running reliably.

PROTOTYPES AND CONTRACT PRODUCTION

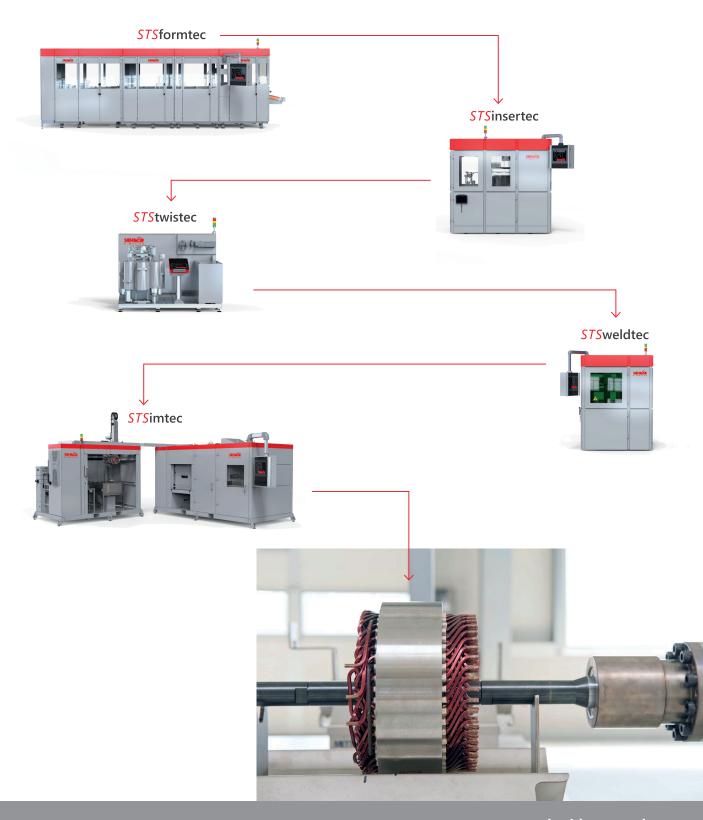

A lot of flexibility is required when creating the initial prototypes. Our demonstration machines allow us to produce your initial prototypes together with you. Furthermore, we are also able to produce larger batches, including B or C sample batches. This means you can investigate a variety of concepts and production processes to get the important insights necessary for series production.

INDIVIDUAL & PRECISE

CUSTOMIZED SOLUTIONS THANKS TO MAXIMUM FLEXIBILITY

With us, you'll get everything from a single source and exactly how you need it. Starting with pin production and pin assembly, to spreading, twisting and welding of pins and through to impregnation - we support and advise you every step of the way. Together we will create a customized solution just for you.

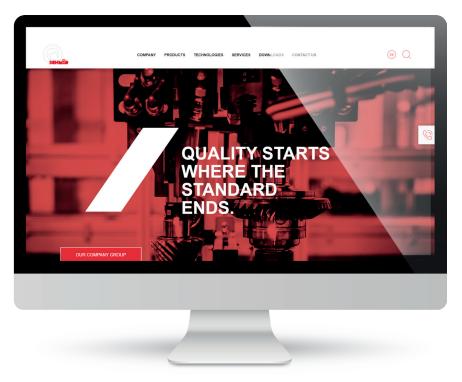

STRONG TOGETHER

THE SCHMID GROUP

As part of the international **SCHMID GROUP**, whose members also include the enterprises EMIL SCHMID MASCHINENBAU, EST TECHNOLOGIE, SCHMID CLEANTECH and SCHMID MACHINERY, SCHMID E-MOTIVE is in a position to access the shared pool of knowledge and services when necessary. We bundle all of our expertise for the benefit of our customers and produce high-quality products.

With us you can plan your success and generate growth, in order to improve your market position for the future. We always attach great importance to confidential technology transfer with you.
